1. Copyright Transfer

If the above paper is accepted, the intellectual property will be transfer to FuCoS. The transfer of the intellectual property includes all the rights for the distribution and reproduction of the paper, including photocopying, trial, translation and microfilm, electronic forms and similar forms of reproduction. The corresponding author has full authority over this assignment and warrants that this paper is original. On behalf of all the co-authors, the corresponding author has the consent to assign the intellectual ownership of this paper to the FuCoS.

2. Pledge on Research Ethics

I pledge that I have complied with the basic principles of research ethics in the course of writing the above paper as follows:

First, the paper was prepared by conducting honest and rigorous research in compliance with the research ethics regulations of the academic society. (Refer to the following)

Second, when writing the paper, it did not engage in any research irregularities that undermined academic integrity, such as forgery, tampering, plagiarism, or

duplicating.

Third, it acknowledged the legitimate efforts of the researchers involved and did not give undue marks of authors to those who did not contribute to the research.

Fourth, the author himself takes full responsibility for all problems and disadvantages that may arise due to his failure to comply with the research ethics.

[List of Research Ethics Compliance]

division	Confirmation		YES	NO
forge	①	There are false data or research results that do not exist, recorded or reported.		
falsify	②	There is a distortion of research contents or results by artificially manipulating research processes (procedures) or arbitrarily modifying or deleting data.		
Plagiarism	③	Some of the original ideas or works of others have already been published (published) and have not been used to indicate their source.		
	④	The original concepts (words), vocabulary (phrases), sentences, paragraphs, drawings, tables, photographs and data of others, not general knowledge, were used directly or indirectly, without revealing their sources.		
	⑤	Some of the writings written by others are not written as they are, but the author has replaced them with paraphrasing or summarizing them, but has not indicated the source.		
	⑥	Some translated or used foreign language papers or books written by others, but did not indicate their source.		
	⑦	Some have translated and used other people's works, but have yet to indicate the source.		
	⑧	He did not do so even though he had to mark his re-employment but expressed the source of the primary literature as if he had seen the original.		
	⑨	Despite proper source indication, the amount or quality cited is beyond a reasonable range and the subject matter is related to the subject matter.		
	⑩	If a work by a person (one person or many) is used, all of them should be source-marked, but only in some cases.		
	⑪	It marked that much of the work of others cited was referenced, but in fact, it was taken.		
duplicated publication	⑫	He used his previous work without presenting the source.		
	⑬	Some of his previous works were used or displayed incorrectly.		
	⑭	He indicated his origin Even so, the content cited in the research report was not within a reasonable range, both quantitatively and qualitatively.		
Unfair Author	⑮	The author did not entitle the rightful qualified person to be the author.
